PROGRAM WILL INCLUDE MANY UNDERSEA CRAFT

tance of Submarines to De-

fense of United States. MAY ASK CONGRESS FOR THIRTY

Congress. From officials in close touch with the administration's plans for the navy, its was learned that while the general board would wait until September before making its recommendations, at least thirty and probably more tions, at least thirty and probably more submarines certainly would be re-

Some naval officers of high rank man. The correspondent has been rank think as many as fifty or seventy-five almost daily with General N—, of submarines would not be too many, but almost daily with General N—, of there who are taking into account the the Russian army or Andranik, the color leader, in pursuit of the

building is not definitely known as yet, those who are familiar with his views on the navy in general, formed since the outbreak of the European war, will not be much surprised if he approves an extraordinarily large program for the construction of under-water craft. The importance of the submarine to the

eral board is ready to make its report next September, the number of sub-marines recommended will depend al-

or by the last Congress for by the last Congress, are being delayed pending the results of experiments now in progress of defense torpedoes. Secretary Laniels said today that Rear-Admiral Taylor, chief of the Bureau of Construction and Repair, was directing the series of experiments, using armaged caissons to represent bardessins.

PROBLEMS OF ARMOR ARE BEING WORKED OUT

PROBLEMS OF ARRIOR

ARE BEING WORKED OUT

It is said that the thickness of armor necessary to withstand the explosion of the most modern torpedoes, and also the amount of hull subdivision required to keep a slip affort after her bottom has been torn open by mine or torpedo are the problems upon which navy officers are working.

A point to be determined is whether the new ships shall carry main batterles of eight ten-inch rifles or of twelve fourteen-inch weapons each.

The new sixteen-inch rifle has proved entirely satisfactory, it has been stated. The big gun has a greater range and striking force than the fifteen-inch weapons of the newest battleships of foreign nations. There is also, however, a tremendous increase in weight, making it necessary to reduce the number of guns carried.

Some officers believe the present fourteen-inch gun, which has a range beyond the reach of vision at sea and tremendous hitting power, should be retained for the new ships, because twelve can be mounted on each ship as against eight sixteen-inch.

With Dead.

[Correspondence of Associated Press.]

RUSSO-ARMENIAN CAMP. NEAR

EASHKALA, KURDISTAN, May 24—

For a epitome of conditions in this region, it is necessary to step only a few yards from Dishkala, on the Chukh Road, to the hamlet of Heresan. There to-day the Associated Press correspondent found sixty Armenian men, all that are known to remain alive and free in a population of 500—not a single woman or child but what had been killed or carried away by the Turks and Kurds.

Half a dozen wells were crammed with the bodies of those who had not been carried away. Sherabeg, a Kurdish chief, began the tavages last fall, killing a score of men and carrying off thousands of head of cattle, some sixty of the sturdiest of the survivors. sixty of the sturdiest of the survivor fled to a monastery, about fifteen mile away, to procure arms and help, by

away, to procure arms and help, but they could not recapture their village, and had to flee for their lives, leaving the remaining population in the power of the Kurds. The latter camped at Heresan all winter and used the women and children as they chose. Immediately after the defeat of the Turkish troops under Hallil Bey, at Dilman, the Kurds foresaw their expulsion and made an end of such of the female and youthful population as they did not take away in slavery.

they did not take away in slavery.

In Bashkala there is no one living now. But lately it was a flourishing
